FLEET TEAM DIGEST

737MAX-FTD-05-17001

Issue Title : Parts Departing Airplane Awareness and Prevention Activity

Airplane Model	ATA	Minor Model(s)
737MAX	0551-59	-7, -8, -8200, -9, -BBJ

Other Model(s)	ECCN
MD-11, 757, 747, 747-400, 767, 737, DC-10, 737NG, 707	9E991

Originated Date	Last Revised Date	Created On
08/16/2017	08/16/2017	08/05/2017

Estimated Completion Date	Next Update Date

Applicability

All airplane models.

Description

Boeing and operators are concerned about parts departing airplanes (PDA). It is in our mutual interest to minimize the volume and type of PDA events. Parts which depart airplanes pose a potential safety risk to persons on the ground, as well as a damage risk to property on the ground. They may also pose a risk to the airplane itself. PDA also impacts airline operations, maintenance activities, and dispatch reliability. The purpose of this FTD article is to highlight Boeing's continued commitment to minimize the number and impact of PDA events, and to encourage PDA data sharing throughout the industry.

Background

Boeing has been collecting data on parts departing airplanes for many years under ATA 0550-90. We have an internal safety evaluation process whereby PDA events are reviewed for potential safety implications, both to continued safe flight and landing of the airplane and to persons on the ground. Additionally, Boeing has a reporting requirement to the FAA under FAR 21.3 for parts which depart airplanes.

Status

Boeing recently reviewed and validated its existing safety evaluation process with regard to PDA events. As part of our effort to emphasize the continued importance of reporting in-service PDA events, we have developed a PDA reporting template to be used by our Field Service Representatives in conjunction with our existing ATA 0551-59 reporting process. We have also built internal cross-organizational awareness of the importance of this issue to our airline customers.

Interim Action

None

Final Action

Boeing will use the Fleet Team Digest as a communication tool. We have created a new category for FTD articles called, 'Parts

BOEING PROPRIETARY - The information contained herein is Proprietary to The Boeing Company and shall not be reproduced or disclosed in whole or in part or used for any reason except when such user possesses direct, written authorization from The Boeing Company. ECCN : 9E991

Departing Airplane'. This new category will be used when new events are reported to Boeing, as well as for issues already in work which are related to PDA concerns. The FTDs will contain event descriptions, as well as reference to any applicable maintenance documents (service bulletins, service letters, CDL items, maintenance tips, etc.) and/or Boeing suggestions for preventive maintenance action (inspections or industry best practices, for example).

To search for 'Parts Departing Airplane' FTD articles, log on to MyBoeingFleet.com. Select FLEET TEAM Digest. Select a model airplane as desired. In the 'Containing Text' field, type in Parts Departing Airplane, then click on Search.

Operator Action

Boeing recommends operators review published FTD articles that fall under the new Parts Departing Airplane category. Operators are encouraged and requested to continue reporting PDA events to their local Boeing Field Service Representative.

Operators are further encouraged to use the Fleet Team IdeaXchange (FIX) Process to initiate dialogue with other operators and Boeing on PDA issues. This is an excellent forum to share experiences and best practices, further enable operators to initiate preventive actions in their fleets, and continue to promote awareness of the importance of this activity.
