Revision Description

Updated Status and Milestones.

Description

Boeing would like to inform operators and Maintenance, Repair and Overhaul (MROs) of an alternate Loop Resistance Tester.

Background

Loop resistance testers are employed as part of the maintenance program to validate the effectiveness of High Intensity Radiated Fields (HIRF) and lightning protection features. Previously, the BAE Systems Loop Resistance Tester (LRT) had been the only approved test equipment to complete HIRF/Lightning maintenance tasks on fueled aircrafts. Several airlines have requested an alternate tester to reduce risk of injury as the weight of the LRT presents a potential ergonomic hazard to airline employees.

Status

The purpose of this message is to inform operators and MRO personnel of an approved alternate LRT, the MK Test Systems Loop Resistance Tester (ExLRT). The ExLRT Part Number (PN) XLR-9703-XX (any variants) can be used in lieu of the BAE Systems LRT PNs 906-10246-3, 906-10246-2, and 906-10246-1. The ExLRT has received intrinsic safety certification, which allows the use of the ExLRT on fueled airplanes. The weight of the BAE Systems LRT is 17 kg and the weight of the ExLRT is 3 kg.

Operators can use the ExLRT to perform tasks that would normally require an LRT, with the exception of maintenance associated with Airworthiness Limitation (AWL) 28-AWL-03. Regulatory approval has not yet been granted for use of the ExLRT tool to perform AWL 28-AWL-03.

Boeing is working with the FAA to update the Boeing Special Compliance Items / Airworthiness Limitations (SCI/AWL) document to allow use of the ExLRT on the task associated with AWL 28-AWL-03.

The certification effort to add the new ExLRT part number into the SCI/AWL document is in-work and is targeted to be completed by Q1 2027.

ECCN : 9E991

FLEET TEAM DIGEST

Interim Action

N/A

Final Action

Boeing plans to incorporate the ExLRT into the SCI/AWL document once necessary regulatory approval is granted. Until regulatory approval is granted, Boeing asks operators to refrain from using the ExLRT on maintenance associated with AWL 28-AWL-03.

Milestones

Note: Target dates are based upon currently available status and have risk of future revision.

SCI/AWL Update: Q1 2027 (Target)

AMM Update: Q1 2027 (Target)

Supplier Information

For more information about the ExLRT, please contact the supplier, MK Test Systems, directly. Their contact information is below:
