FLEET TEAM DIGEST

737MAX-FTD-23-26001

Issue Title : Use of Noise Canceling and Active Noise Reduction (ANR) Headsets While Operating Boeing Airplanes

Airplane Model	ATA	Minor Model(s)
737MAX	2351-00	-10, -7, -8, -8200, -9
Other Model(s)	**ECCN**	
	9E991	

Originated Date	Last Revised Date	Created On
08/26/2026	08/26/2026	08/19/2026
Estimated Completion Date	**Next Update Date**	
12/31/2026	11/20/2026	

Applicability

Boeing Airplane Models: 737 MAX freighter and commercial passenger variants in combination with Active Noise Reduction (ANR)/Passive Noise Reduction (PNR) headsets.

Description

It has come to Boeing's attention that some commercially available headsets, including newer models with advanced ANR/PNR technology, can attenuate aural alerts in the cockpit, reducing their audibility or, in some cases, rendering them inaudible.

Status

An operator has reported to Boeing that crew members missed several Traffic Alert and Collision Avoidance (TCAS) aural alerts while using headsets with ANR/PNR technology. Aural alerts are intended to be delivered through the flight deck speakers and are not routed through the flight crew headsets on most Boeing models. The continued use of ANR/PNR headsets can result in such a reported example instance.

Interim Action

N/A

Final Action

Boeing recommends that operators who currently use ANR/PNR headsets to conduct an evaluation of the respective headsets relative to time sensitive aural alerts.

Milestones

N/A
