737MAX-FTD-34-17004

Issue Title : Honeywell Weather Radar Transceiver P/N 930-2000-010

Airplane Model	ATA	Minor Model(s)
737MAX	3441-41	-7, -8, -8200, -9, -BBJ

Other Model(s)	ECCN
737NG	9E991

Originated Date	Last Revised Date	Created On
06/15/2017	06/15/2017	02/01/2017

Estimated Completion Date	Next Update Date

Applicability

737 MAX airplanes equipped with Honeywell RDR-4000 Weather Radar Transceiver P/N 930-2000-001.

Description

Current Honeywell Transceiver P/N 930-2000-001 is obsolete and being replaced by Transceiver P/N 930-2000-010. The new part is Form, Fit, Function (FFF) compatible with the existing Transceiver.

Background

Transceiver P/N 930-2000-001 contains a Field Effect Transistor (FET) that is obsolete and requires replacement. The replacement of this part requires a new transmitter section design and thus the creation of the new part number 930-2000-010. There are no software or firmware modifications associated with this change. The new transceiver, 930-2000-010, is two way interchangeable/intermixable with the current transceiver, 930-2000-001. See the referenced Honeywell Service Information Letter (SIL) for additional information.

Status

Transceiver P/N 930-2000-010 will be installed in production starting at line number 6417.

Interim Action

New 737 MAX aircraft configuration option numbers will be created to support the P/N 930-2000-010 transceiver change:

-Existing Single WxR System Honeywell Model RDR-4000 with PWS option 3443B696K87 will be replaced by option 3443E724A55

-Existing Dual WxR System Honeywell Model RDR-4000 with Predictive Windshear (PWS) option 3443E724A12 will be replaced by option 3443E724A60

Final Action

Fleet interchangeability will be reflected in the Airplane Illustrated Parts Catalog (AIPC).

Operator Action

Operators should be aware of the new part availability/interchangeability, and the associated aircraft configuration options available for their 737 MAX airplanes.
