Pump Change-over Control Box – General Data

1. Description

The Viking Air Limited Pump Change-Over Control Box. P/N C6NF2232 (Figure 1) forms part of the fuel control system, and consists of a rectangular aluminum alloy box which houses the two booster pump transfer relays (K1, K2) and a number of diodes. Electrical connection to the box is via a multipin connector. The control box is located just forward of the instrument panel.
